PROFESSIONAL SUMMARY

Results-driven Computer Science student specializing in native Android development and software engineering. Experienced in building scalable mobile applications using Kotlin, Jetpack Compose, and MVVM architecture. Strong foundation in Data Structures and Algorithms, with proven ability to architect complex systems, integrate RESTful APIs, and deliver user-centric solutions in Agile environments.

EDUCATION

Jaypee University of Engineering & Technology, Guna, MP

2022 – 2026

Bachelor of Technology in Computer Science Engineering (B.Tech)

Expected Graduation: June 2026

TECHNICAL SKILLS

Programming Languages: C, C++, Kotlin, SQL

Mobile Development: Jetpack Compose, Android SDK, Material Design, MVVM, Hilt

Frameworks & Tools: Firebase, Retrofit, Git, GitHub, Coroutines, StateFlow

Databases: Room, Firebase Realtime DB, Cloud Firestore

Core Concepts: Data Structures & Algorithms, REST APIs, Clean Architecture, Agile/Scrum, Problem Solving

EXPERIENCE

JOHRISOFT

May 2025 – Jul 2025

Software Development Intern

Kota, Rajasthan

- Developed and integrated 5+ RESTful APIs, improving backend data flow and reducing API response latency by approximately 20%.
- Collaborated in a 5-member Agile team using Git for version control and Jira for sprint tracking, delivering features on time.
- Refactored legacy modules into reusable components, reducing debugging time by approximately 25% and enhancing code maintainability.
- Gained hands-on experience with corporate workflows and industry-level engineering standards.

PROJECTS

AlgoViz+ – Competitive Learning Platform

Feb 2026 – Present

- Built an Android platform with 25+ algorithms featuring interactive step-by-step visualization and customizable inputs for DSA learning.
- Designed scalable Clean Architecture (MVVM + Hilt, Jetpack Compose) with Firebase integration, optimizing performance and enabling real-time state management.

FinSetu – Expense Management System

Apr 2025 – May 2025

- Developed a real-time expense management app supporting 100+ users with secure authentication and automated expense splitting using Firebase.
- Implemented MVVM architecture with Jetpack Compose and optimized data synchronization using Coroutines, improving responsiveness and user experience.

ACTIVITIES & LEADERSHIP

Mozilla Phoenix Club – JUET

Jul 2025 – Present

- Organized an Accenture Mock Test for 300+ students using a student-built website platform.
- Initiated Hacktoberfest 2024 in collaboration with Major League Hacking (MLH), encouraging open-source contributions among students.

TEDxJUET

03 May 2025

- Served as Logistics Head, managing operations for 100+ participants and coordinating team schedules.
- Handled vendor communication, event setup, and post-event wrap-up, ensuring zero operational delays.

HackVSIT 6.0 Hackathon

Feb 2024

- Participated in a 24-hour hackathon focused on social good, building an innovative solution as part of a cross-functional team.
